SKILLS

Frontend: HTML, CSS & Tailwind CSS, JavaScript, React.js, Next.js
Backend: Node.js, Express.js
Database: MongoDB, MySQL, PostgreSQL
Languages: JavaScript, Python, SQL
Additional: ROS (Robot Operating System), Data Structures & Algorithms (Python & JavaScript), Beginner in AI/ML & Data Science

EDUCATION

Bachelor of Engineering in Computer Science and Engineering
SN Patel Institute of Technology Gujarat Technological University
Expected Graduation: 2027 | CGPA: 8.0/10

EXPERIENCE

Freelance MERN Stack Developer

Self-Employed | Remote | 2025 – Present

LR Software jha-systems-bills.vercel.app

- Delivered custom web applications for business clients using MERN stack technologies.
- Developed and commercially deployed LR management software for logistics operations.
- Collaborated with clients to gather requirements and implement scalable workflow solutions.
- Managed deployment, authentication systems, and backend functionalities for production applications.

PROJECT

LR Web Application

jha-systems-bills.vercel.app

- Developed and commercially deployed a full-stack LR management software for real business clients using React, Node.js, Express.js, and MongoDB.
- Built a secure multi-tenant system allowing multiple clients to use the same platform with isolated company data.
- Implemented JWT authentication, protected routes, REST APIs, and dynamic PDF generation for client-specific LR documents.
- Designed scalable backend workflows and logistics management features for real-world business operations.

AI SaaS Web Application

gen-ai-lilac-ten.vercel.app

- Built a full-stack AI SaaS platform using the PERN stack and Tailwind CSS with a modern and responsive UI.
- Integrated AI features such as intelligent chat, AI image generation, resume review, blog title generation, and background/object removal.
- Implemented secure authentication using Clerk and integrated APIs like Groq and Cloudinary.
- Developed a global publishing system where users can upload images and interact through likes and social-style engagement.

Food Delivery Website With its Admin Panel Website

just-eat-8uut.onrender.com just-eat-manager.onrender.com

- Developed a full-stack food delivery platform and admin panel using the MERN stack with responsive UI built in React and Tailwind CSS.
- Implemented customer features such as authentication, menu browsing, cart management, order placement, and automatic price calculation with secure REST APIs.
- Built a dedicated admin dashboard for managing food items, categories, inventory, and real-time order tracking with role-based access control and CRUD operations.
- Used Node.js, Express.js, and MongoDB for backend development and deployed the applications on Render.

Portfolio Website

ronak-jha-portfolio.vercel.app

- Built a responsive portfolio website using Next.js and Tailwind CSS.
- Showcases projects, skills, and experience with a modern UI.
- Implemented SEO optimization, server-side rendering, and reusable components.
- Added smooth navigation and fully responsive design for all devices.
